

APPLES – Require pollination

Ripening date in W.N.Y., Ex: MC INTOSH(9/25)

GALA(9/1)-Golden Yellow skin with scarlet stripes. Yellowish white flesh is firm, aromatic. Semi-sweet & fine textured. Tolerates hot summer areas.

MC INTOSH(9/25)-Roger's Red Strain. Solid bright red color, a favorite for many years.

HONEY CRISP(9/25)-Vigorous, very hardy, slightly spreading tree produces sweetly tart, juicy crisp fruit – Sept thru Oct. Stores well.

CORTLAND(10/1)-Very heavy annual bearer, produces large, firm, red striped apples with very white flesh. Favorite dual-purpose apple.

MACOUN(10/1)-Considered the highest quality dessert apple grown in the Northeast. Dark red with firm white flesh.

FUJI(10/2)-Reddish green fruit with flavorful, crunchy, juicy white flesh. Excellent storage life.

WOLF RIVER(10/1)-Old Reliable Variety. Hardy productive tree bearing large fruit (one pound or more). Baking, sauce or drying. Mid Sept – Early Oct.

STAYMAN WINESAP(10/5)-Medium to large red apples with firm, juicy flesh of sprightly flavor. Very long storage life.

HARALSON(10/5)-Very hardy apple from the MN Experiment Station. Bright red medium size fruit. Firm & tart, great for eating & baking. Good storage life when refrigerated. Disease resistant.

LIBERTY(10/7)-Disease resistant apple from the N.Y. Experiment Station. Almost completely immune to Apple Scab. One of our top sellers when introduced for retail sales in 1981. Very hardy, good dessert apple.

EMPIRE(10/10)-Top quality eating apple; one of the best tasting McIntosh types available. Keeps exceptionally well when refrigerated. Hardy, productive trees.

DBL. RED DELICIOUS(10/12)-Very dark Red Delicious strain. Still America's most popular apple; one of the best available.

JONAGOLD(10/15)-Excellent all-purpose apple having the highest dessert quality. Fruit has attractive red blush over a yellow base. Stores until spring at 31° F.

BRAEBURN(10/20)-Heavy crops of aromatic, green oval fruit with deep red stripes. Mildly sweet, firm crisp and juicy with excellent flavor. Good storage life.

IDARED(10/23)-Best new dual-purpose apple. This bright red keeper is great for salads, desserts, processing and in-hand eating. Very juicy fruit hardy trees.

YELLOW DELICIOUS(10/23)-All time favorite yellow apple. Firm, crisp, very juicy flesh. Keeps very well. Trees bear young and heavily.

NORTHERN SPY(10/25)- Old favorite apple still in demand. Good eating apple. Tops for baking or applesauce.

CRISPIN(10/27)-Formerly Mutsu. High quality, dual-purpose apple. Large, yellow fruit has excellent storage life.

GRANNY SMITH(11/07)-Green with firm, crisp flesh. Long storage life.

PLUMS-Require pollination. European & Oriental types do not cross pollinate.

(Listed in order of ripening)

SHIRO-Very early, yellow, Oriental plum. Medium sized, juicy, flavorful fruit suitable for cooking, canning, fresh eating. Ripens late July.

SANTA ROSA-The best Oriental plum. Large, purplish-red, very sweet juicy fruit. Vigorous, productive trees. Ripens early August. Freestone.

SUPERIOR-The biggest, most flavorful Oriental plum. Fruit is bright red, very juicy. Fast growing, super hardy, productive trees ripen early August.

BURBANK-Large Oriental plums are meaty and firm. Hardy, prolific trees are low growing and spreading of habit, making the fruit easy to reach. Ripens mid-August.

ABUNDANCE-Purple-red Oriental plum with tender, sweet yellow flesh of excellent quality. A good pollinator. Ripens early-mid August.

STANLEY-The most popular of all purple European prune-plums. Great for canning, cooking, drying and very delicious and sweet fresh from the tree. Hardy, vigorous trees are **self-pollinating** and very productive; ripens early September.

FELLENBURG (German Prune)-A popular European type for many years, the fruit is a dark purple, oval shaped, freestone and the tree is **self pollinating**. Ripens early September.

GREEN GAGE (Reine Claude)-Very old European plum. **Self-pollinating** trees produce large crops of yellow-green fruit with a reddish cheek. A delicious fruit that has been popular for almost 300 years. Ripens mid-September.

APRICOTS-Self fruitful

MOORPARK-Orange-yellow speckled fruits are very large, sweet, juicy and full of flavor. Top commercial variety for years. Ripens mid-August.

PEACHES-Self fruitful

(Listed in order of ripening)

RELIANCE-Medium sized, yellow fleshed peach ripens mid-August. Flesh is soft and juicy and flavor is good; freestone. Hardest of all peaches.

REDHAVEN-The most widely grown peach in N.Y. ripens mid-August. Flesh is firm, very juicy, very sweet and freestone. Trees are very productive and almost as hardy as Reliance.

GOLDEN JUBILEE-High quality, early peach. Ripens with Redhaven. Large fruit. Attractive yellow skin with red cheek; freestone. Good quality, hardy tree.

HALEHAVEN-Old favorite with large, oval fruit, dark red skin. Firm, freestone peach of excellent flavor; one of the best for canning and freezing; ripens late August. Disease resistant.

ELBERTA-World's favorite peach. Hardy, disease resistant trees, large, golden yellow, freestone peaches with tender, juicy flesh. Ripens late September.

NECTARINES-Self fruitful

FANTASIA-Large, egg-shaped fruit. Excellent quality, smooth flesh. Ripens around Labor Day in the east.

HARDY RED-Mild, slightly tangy juicy freestone fruit. Resists brown rot and leaf spot. Ripens mid to late August. The hardest nectarine.

RED GOLD-Spherical shaped, high quality yellow fleshed fruit in mid August. Most widely planted nectarine in the U.S.A

CHERRIES-Require pollination, except as noted

(Listed in order of ripening)

BLACK TARTARIAN-Very large, black, sweet cherries are tender, juicy and very flavorful. Productive, vigorous trees bear heavily each year. Ripens mid-June.

ROYAL ANN (Napoleon)-Beautiful, large, pale yellow cherries with bright red cheeks; firm, juicy, tasty flesh is very sweet. Ripens shortly after Black Tartarian, bears large crops.

LAPINS-Dark red-black sweet cherries with firm, flavorful flesh. Ripens in late June. **Self-pollinating**.

BING-New Hardy Sweet Cherry. Almost black, freestone, very flavorful. Highly productive-seldom affected by winter temperatures or spring frosts. Does not crack.

STELLA-The first **self-pollinating sweet cherry!** Unlike other sweet cherries. Stella needs no pollinator in order to set a good crop of fruit. One of the top selling trees in retail markets because a homeowner only needs one to have high quality sweet cherries. Very productive trees and is a good pollinizer for other sweet cherries. Ripens mid-July. Very sweet black cherries.

VAN – Resembles Bing with smaller fruit. Very Cold Hardy. Pollinator required. One of the best pollinators for other sweet cherries.

MONTMORENCY- King of all pie cherries. Millions of tons are harvested annually. Vigorous, productive trees bear in late July. **Self-pollinating**.

NORTH STAR-Genetic Dwarf pie cherry. **Self-pollinating** with bright red, juicy flesh. North Star is very hardy, disease resistant and the perfect cherry tree for a homeowner with limited space. Ripens late July. Grows 6'-7'

PEARS-Require pollination (Listed in order of ripening)

MOONGLOW-Large early-ripening variety. Soft, moderately juicy yellow fruit with good flavor. Ripens in late summer.

RED BARTLETT-Large red-skinned fruit. Smooth, juicy white flesh has a hint of tartness. Stores well. Ripens late August.

KIEFFER-Old Fashioned, reliable tree produces large, yellow fruit with crisp, juicy coarse flesh – **self-pollinating**

ANJOU-Large fruit with buttery smooth flesh and fine texture. Excellent for fresh use. Light green fruit ripens mid-September

BARTLETT-The world's favorite pear. Large, sweet pears with a yellow skin and tender melting flavor are great for eating fresh and for canning and cooking. Ripens late September and will keep until December.

SECKEL-Small, yellowish-brown pear with the best flavor of all; sometimes called the "sugar pear" because it is so sweet. Very productive, **self-pollinating** trees are favorites of the home gardener. Disease resistant. Ripens late September.

FLEMISH BTY-Hardest of all pears. Yellow skin with red blush. Firm, white, sweet flesh. Ripens in Sept. Self Fertile, but does better with pollination.

BOSC-Dark yellow with brownish russeted skin. Tender, aromatic, juicy, smooth textured white flesh, slightly acidic. Very productive and reliable large upright tree.
